NEW JERSEY
1980 CENSUS OF POPULATION AND HOUSING
MUNICIPAL PROFILES
VOLUME III: CHARACTERISTICS OF HOUSING UNITS

THE REPORT

This report presents 1980 Census data on the characteristics of housing units for New Jersey. The data represent tabulations of 100% data items from the 1980 Census questionnaire, i.e., those items which were asked on every questionnaire. The tables which follow were obtained from the first 1980 Census Summary Tape File (STF1) for New Jersey and account for approximately one-third of the tables for geographic areas contained on STF1. The remaining two-thirds have been published in companion volumes - Volume I: Characteristics of Persons; and Volume II: Characteristics of Households and Families. Additionally, 3 similar volumes have been published detailing data for counties. These publications are all available through the New Jersey State Data Center (see below).

Inquiries regarding this publication should be addressed to: Connie Hughes or Roger Linder (609-984-2593).

CAUTIONS AND LIMITATIONS

Caution should be exercised when using the data in this report for several reasons. The racial categories of the 1980 Census are not strictly comparable to those of other censuses. In particular, the 1980 data for "Whites" and "Other" cannot be compared to 1970 data with the same designations. Also, "Spanish Origin" is considered an ethnic not racial designation. A person of Spanish origin may be of any race. Additional definitional concepts and caveats are presented on the footnote page at the end of this publication.

The data in this report incorporate revisions to the 1980 Census counts for New Jersey as of December 1981. These revisions reflect changes to the total population of New Jersey, Essex County, and the municipalities of Evesham Township (Burlington County), Medford Township(Burlington County), and East Orange City (Essex County). Thus, the total populations for these areas in this report supersede population totals published prior to December 1981.

Although the Census Bureau regards total population figures as final, the population counts for Essex County and each jurisdiction within the county are not final. "The Census Bureau attests that Essex County tabulations are those which would have been reported and transmitted as final but for the injunction of the court in the case of Shapiro vs. Klutznick." In general, however, all the 1980 Census figures are subject to change, pending the outcome of other lawsuits dealing with the census counts.

STF1 DATA FINDER GUIDE

The following page is the STF1 Data Finder Guide. This Guide provides a cross-reference to the data items contained in this and companion volumes. Data items are listed in alphabetical order, followed by the STF1 table number (the table number on the computer tape), the profile number (this corresponds to the appropriate publication volume number), and the table number (the number of the table on the profile). For example, for data on median age, look under "Age". "Median" is listed indented under "Age". This data is presented in Profile 1 (or Volume I: Characteristics of Persons) on Table 5.

THE NEW JERSEY STATE DATA CENTER

This publication is a product of the New Jersey State Data Center(NJSDC), which is a cooperative project of the State of New Jersey and the U. S. Bureau of the Census. Serving data users in the public, private, and academic sectors, the NJSDC has among its objectives the expansion of access to and use of census statistics, the provision of technical assistance and analytical support in the use of these statistics, and the provision of user training on timely, census-related topics.

The NJSDC consists of many agencies, thereby extending its services to data users throughout the state. The project coordinator is the Office of Demographic and Economic Analysis in the New Jersey Department of Labor. Primary participants are: the State Library, Rutgers-The State University and Princeton University. These are four major resource centers.

Each agency of state government has a satellite office of the NJSDC which maintains basic census and agency statistics.

To provide local access to and technical assistance in the use of census data, a network of county affiliates has been established. The federal depository libraries of the state also maintain collections of census products.

In addition, the Delaware Valley and Tri-State Regional Planning Commissions cooperate in the NJSDC program.

A list of the names, agencies, and phone numbers of NJSDC participants can be obtained by contacting NJSDC, Office of Demographic and Economic Analysis, Division of Planning and Research, Department of Labor, CN388, Trenton, NJ 08625.

1980 CENSUS
PROFILE FOOTNOTES

1 The count of households in the complete count tabulations by definition equals the number of occupied housing units. In this document, the terms households and occupied housing units are used interchangeably.

2 Vacant seasonal/migratory units are excluded from all other tabulation matrices.

3 For data tabulated on a 100-percent basis, includes all persons in the category "Other." For sample data, excludes those persons who have a write-in entry of an Asian & Pacific Islander group in the "Other" category.

4 "Asian and Pacific Islander," in the 100-percent tabulations, includes: "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

5 Relatives include: householder, spouse, and the questionnaire categories: "Son/daughter," "Brother/sister," "Father/mother," and "Other relative." Tabulations of "Other relatives" include all categories not shown separately in the matrix.

6 Nonrelatives include the questionnaire categories "Roomer, boarder," "Partner, roommate," "Paid employee," and "Other nonrelative." Tabulations of "Nonrelatives" include all categories not shown separately in the matrix.

7 Tabulations of "Persons in household" based on 100-percent data by definition are the same as tabulations of "Persons in unit." The phrase "Persons in household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case, the phrase "Persons in unit" is used. Tabulations of "Persons in unit" based on sample data are not necessarily the same due to differences in the procedures used to inflate sample population and housing data.

8 A "Child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

9 Vacant housing units include the questionnaire categories: "For rent," "For sale only," "Rented or sold, not occupied," "Held for occasional use," and "Other vacant." Tabulations of "Other vacant" include all categories not shown separately in the matrix.

10 This aggregate, along with the relevant count will permit the computation of a mean. For example, the aggregate value for the owner-occupied noncondominium units will yield the mean or average value when divided by the number of specified owner-occupied noncondominium units, and the aggregate number of rooms for occupied and vacant year-round units yields the mean or average number of rooms. (See footnote 14 prior to computing mean value.)

11 The noncondominium value distribution is restricted to certain kinds of "owner-occupied" or "vacant for sale only" units. The following are excluded from the tabulations on value for noncondominium units:

- A. Units at an address with two or more units
- B. Units on 10 or more acres
- C. Units with a commercial establishment or medical office on the property
- D. Mobile homes or trailers

Value is tabulated for all owner-occupied and vacant-for-sale condominium units.

12 Contract rent is tabulated for all "renter-occupied" and "vacant-for-rent" units except 1-family houses on a property of 10 or more acres. Units tabulated in the "No cash rent" category are all occupied housing units reported as "No cash rent" except one-family houses on 10 or more acres.

13 Lacking complete plumbing (facilities) for exclusive use includes: Complete plumbing (facilities) but also used by another household, some but not all plumbing facilities, or no plumbing facilities.

14 Multiply the aggregate value by $250 to obtain the true value. The tabulation was scaled by a factor of $250 for tally purposes.
